Assignment 1:

Design the following website using only HTML. The details of the website are as follows:

- (Weight: 25%) Use tables for the layout of the home page (Figure 1) and the registration page.

- (Weight: 10%) When the user clicks About, it will take them to this link:

  https://www.umkc.edu/about/ in a new tab.

- (Weight: 25%) Use headings, lists, and paragraphs to format the text in the homepage.

- When the user clicks the register now image, it should take them to the registration page

  (Figure 2).

- (Weight: 20%) Embed this YouTube video in the homepage:

  https://www.youtube.com/watch?v=1rwc_O6geNU

- (Weight: 20%) For the registration page (Figure 2), just adapt the file that you can find on

  Canvas (HTML/Solutions/Task_5.html). You will only need to add the group boxes.

Notes:

- Of course, your pages should look like the figures, but they don't have to be the exact same.

- You can find the images on Canvas under Modules -> Assignment Images

- Submission: I expect a zipped file. Zip the html files together with the additional folders (e.g.

  images).

- You may use whatever software you wish to work on this—VS Code, NetBeans, an online

  compiler somewhere, anything goes.

UMKC University of Missouri-Kansas City

About

Welcome to the University of Missouri-Kansas City.

This website is dedicated for:

- Students
  - Full-time students
  - Part-time students
- Professors
